## THE MINES OF NEW-MEXICO.

COAL DEPOSITS ON THE ORTIZ GRANT. APPARENTLY INEXHAUSTIBLE BEDS OF ANTHRA-CITE-A FAVORABLE COMPARISON WITH THE PRODUCT OF PENNSYLVANIA MINES-AVAIL-ABILITY AND RAILROAD FACILITIES-OTHER VALUABLE MINERAL DEPOSITS.

SANTA FE, N. M., Aug. 28.—I have always listened with a great deal of distrust to all reports of the discovery of anthracite coal west of the Appalachian range of mountains. Bituminous coal is but in many portions of the Rocky Mountain regions, and some of it is of a very superior quality, but generally when a man thinks that he has discovered a vein of anthracite coal, it turns out | coal will be about 200 tons, and it is certain tha that is a little brighter or a little heavier than that ordinarily discovered. I had never read anything about the anthracite beds of New-Mexico before roming here, and when Mr. Sickels told me about those in the Old Placer Mountains and offered to take me to see them, I was prepared to see a coal that contained a very small percentage of bitumen, but was still incredulous about its being true anthracite. Since my visit I have read the reports | railway grades in the world. Even if coal should and compared the analyses of the coal made by | be obtained on the Maxwell Grant on this side of such men as Professor R. W. Raymond, Lieutecant George M. Wheeler, Professor Hayden, Dr. J. L. Leconte, and half a dozen others of wide reputation as geologists, so that even though I might be deceived by its appearance, there can be no mistake in regard to its character.

The coal banks on the Ortiz Mine Grant, accord-

ing to a recent mineralogical survey made for the Atchison, Topeka and Santa Fe Railroad Company, underlie a territory about a square mile in grant, among the foot-hills of the Placer Mountains, and, although the roads to them are now very bad, they can be made easily accessible to the railroad. Indeed, tac Atchison, Topeka and Santa Fe Company has already surveyed lines from its track to dustry. the main openings, made profiles and staked out the curves, so that if it is concluded to build a branch to them, as I believe will be done this autumn, the work is all ready for the contractor. The distance by one route is seven and by the other three and a half miles, the maximum grade on either being only seventy-five feet to a mile.

I went to the coal mines from the Real de Dolores, following the read over the mesas and clay at Colonel Gillette's camp on the Canon del across two deep arroyes for a distance of five or | Agua Grant, which looked as good as the fire-clay six miles. Arriving at the top of a ravine a hundred feet deep, we left our carriage and climbed down to the mouth of the tunnel that has been driven in upon the vein in the old mine. We should have had difficulty in finding the place if we had not taken along with us a Mexican as a guide. He walked by the side of the carriage, and

the canon consists of felsuathic porphyry, which extends from the bottom to the level of the adjoining mesa, covered with a wash consisting of disintegrated sandstone and shale. The tunnel, which follows the dip of the vein upward at an angle of bottom of the tunnel there is a stratum of anthra- I was sure to see something strange. Z. L. W. cite coal two feet in thickness, lying upon slate or shale, probably the fermer, which constitutes its floor. Above this there is a layer, or bone, as the miners call it, of slate, ten inches thick, and then another vein of anthracite coal one and a half feet thick. On the top of this there is shale and sandstone which seems to constitute the bulk of the everlying strata.

QUALITY AND QUANTITY OF THE COAL-The coal, some specimens of which I broke out of the mine, looks exactly like the best of Pennsylvania anthracite. It has the same bright appearance and conchoidal fracture, and, as we walked over it where it had been mined and piled up at the mouth of the tunnel, it gave forth the ringing metallic sound so familiar to those who use the Eastern hard coal. Some of it, which was removed from the tunnel mouths ago and has lain in the open air exposed to the weather, was remarkably bright, even for anthracite, and showed no signs of decomposition.

Professor Raymond reports that during his a man with a similar mania info hundred feet below the old mine, an exposed section, probably uncovered during the previous rainy season, which showed the existence of at least four beds of coal that may be profitably worked. The half feet in thickness. The second one, twelve feet above this, is six feet thick, and reported as " apparently good? Fourteen feet above this, or sixtyeight and a half feet from the bottom of the ravine, is a thin stratum of coal, fen inches thick, and, separated from it by slate only eight inches thick, another vein twenty-six inches through. This is perhaps identical with the lower vein in the tunnel. which, by a careless measurement, I made two feet thick. On the top of this lies six feet of sandstone and shale, and then coal again fourteen inches in thickness. Three feet further up there is another coal vein three feet thick, and above this, beneath the gravel of the mesa, one or two thin veins of shaly coal, probably of no value. The geological formation as shown by this section seems to prove that the two veins in the old mine comprise a very small part of the coal that is to be found there.

I did not visit the new mine, which is about a mile and a half from the old one, but the reports upon it and the analyses of the coal taken from it which I have seen show the vein to be five feet thick, and the coal to be of equally good quality with that taken from the old mine. There are three tunnels in the new mine, but I did not learn the length of them. In 1870 two of them were twenty-five feet long, and one forty feet long. The new mine is on that portion of the Ortiz Grant which as I said in a former letter, was in dispute but the title to it will probably be amicably ar-

The Atchison, Topeka and Santa Fe Railroad Company has recently caused a thorough exploration of all the surrounding country to be made, in the hope of finding good coal on the public lands. the title to which it could acquire, but has been unsuccessful. A shaft was sunk in a caffon be tween the Ortir coal mines and the radroad, which was carried down to a depth of 600 feet and I visited it on my way out. At this depth, I have been told, the Ortiz veins were found, but the expense of working a mine of that character would be so great that the shaft was abandoned. The section exposed by this shaft showed twenty-seven veins of coal, but some of them, except those which were deepest, were of much economic value.

ANALYSES OF THE ANTHRACTIE. In order to show the constituents of this New. Mexico anthracite, I have compiled a table from some of the different analyses that have been made of it. The first is taken from Lieutenant Wheeler's report for 1875; the second from a " Report on the Mines of New-Mexico," published in 1865 by Professors R. E. Owen and E. T. Cox, of the Indiana State University; the third is an analysis made by Professor J. L. Leconte, who was, in 1868, the geologist of the survey for the extension of the Kansas Pacific Kailway; and the last is an analysis of Pennsylvania anthracite taken from "Dana's

Mineralogy."				Penn.

Tetals...... 100.00 100.00 100.00 98.66 "True anthracite," so the books say, "has a specific gravity of 1.4 to 1.7; its hardness is 2 to 2.5; and it contains 85 to 93 per cent of fixed carbon; and volatile matter, after drying, 3 to 6 per cent. It is amorphous, of conchoidal fracture, brittle, has a sub-metallic lustre, iron black to

produces an intense heat." This is an exact description of the coal in the Ortiz mines.

RAILEGAD FACILITIES. Of course, with an enterprising railroad like the Atchison, Topeka and Santa Fe running within three miles and a half of them, such coal mines as these will not long remain undeveloped, but the first use to which the coal will probably be put will be in making steam to pump water for hydraulic mining on the Old Placers of the Ortic Grant, as described in my last letter. Mr. Siekele estimates that the coal ought to be mined and de livered at the pumping station, which will be only very abundant, not only in the Mississippi Valley a few rods from the railroad, for \$1 50 a ton, and his estimates of the cost of pumping water ar based on the supposition that it will certainly cos no more than \$2 a ton. The daily consumption o that he has only found a deposit of bituminous ceal | the railroad company could make a handsome profit on the transportation of this amount or coal, abou ten miles, part of the way down hill, and all the

way over easy grades, for 50 or 75 cents a ten. But the Ortiz Company is in condition to offer special inducements to the owners of the railroad for reasonable rates of freight. The latter now hauls all the coal that it uses in New-Mexicco from Trinidad, Colorado, over two of the most difficult the Raton Mountains, it would still be necessary to haul the supplies of coal for use south of here ever the Santa Fe range with its grades of 186 feet to a mile. If the company could take its coal for use between here and El Paso, about 325 miles, and or its Guaymas and Atlantic and Pacific lines, from the Ortiz mines, it would be saved great expense in transportation; for, from the mines to the Texas line, the road follows the Rio Grande River all the way on a down grade, I think, therefore, that some arrangement will probably be made between extent, and are, therefore, substantially inex-haustible. They he in the northern part of the which each will get its coal at very reasonabl cost. There will also be a demand for the coal in Santa Fe and in other New-Mexican towns that are certain to become important centres of in-

DEPOSITS OF CLAY AND IRON.

Near the old coal mine there is a bed of excellent fire clay, which Professor Raymond, in his report for 1870, said had been thoroughly tested by one of his assistants. A scorifier was made of it, and lead and borax was smelted in it in the hottest anthracite fire. It neither cracked nor was attacked by the flux. I saw some bricks made of this fire bricks used in furnaces in the East, and I was told that they had stood very severe tests in the assay furnace. Colonel Gillette said that the brick were worth 80 cents each-that being the cost of deliv ering equally good ones made in the East at his

I saw also in the vicinity of tife coal mines outcould easily have made better time than the herses, croppings of iron ore, chiefly brown hematite, that The tunnel starts into the cliff near the bottom | seemed to be rich. Magnetic ore of great purity is of the ravine on its western side. The east bank of | said to be found in almost inexhaustible quantities in the Placer Mountains, but I did not see any of it. I did see some pebbles and boulders of it on the placers called by the Mexicans " la guia del oro," because of their association with auriferous gravel

The Ortiz Grant, aside from the economic value about fifteen degrees is between five and six feet of its mineral deposits, is geologically one of the high, minety feet long, and has connected with it | most interesting regions I have ever visited. In several short drifts north and south. At the whichever way I turned, during my stay upon it,

SOME SINGULAR DELUSIONS.

MONOMANIACS HAUNTING PUBLIC PLACES A FANCIED PURSUIT BY DEJECTIVES-IMAGINARY CLAIMS ON PUBLIC, PROPERTY-CRAZY ON THE SUBJECT OF CIPHERS.

The Police Central Office in this city, as well as the courts and the newspaper offices, appears to have its special imenomaniac. As in the other cases, the deluded person is a woman, and like the others she is a poor harmless creature who excites pity netwithstanding the absurdity of her disordered fancies and the sincerity and earnestness with which she narrates her imagined wrongs. She believes herself to be under the espionage of 2.000 detectives, who follow her in the interest o the German Consul, who she thinks has secret offices in Police Headquarters and deep designs against her peace and comfort. She tells all this with a rational air and quiet manner until she The three feet and a half of coal exposed in the perceives that she is not credited, and then grows tunnel of the old mine is by no means all that there | a little excited and becomes noisy. Some years ago visit in 1874 he discovered in the caffon, a few houses and newspaper offices. He imagined that he was pursued, not by detectives, but by doctors who wanted his body for dissection; and he would narrate to any one who would listen long tales of the methods they pursued to capture him. As lowest one begins thirty feet from the bottom of proof of the truth of what he would relate he the bluft is of excellent quality, and is four and a balf feet in thickness. The second one twelve feet which was a report filling half a column of the trial of a physician of London on the charge of conspiracy against him. Of course the report only disclosed that he was insane, but this the poot fellow could not recognize. He disappeared several years ago. His natural successor seems to be the unfortunate creature who appeared at headquarters recently. Another unfortunate, familiar in the newspaper offices, is an old man who claims to know where Stewart's body rests, but who says that the executors refuse to take possession of it, not to escape paying the reward, he will tell you with great earnestness, but because one of them wants the grand mansolenm which Mrs. Stewart built at Garden City reserved for himseif! He tells his story with such plausibility of manner and incident and detail, too, that one hardly suspects his sanity until he reaches this astounding climax, when his manner changes instantly to herceness.

The little Miss Phte, of the Court Bouse and City Hall, is a woman of forty-five or fifty, and evidentity very poor. She visits the public buildings once every month and makes formal demand of the various officials for her rent or the use of the buildings. Her mania is that she is the owner of the public property of New-York. In her demands for her money she interrupts proceedings in the courts and other offices, but she is never violent. and is easily induced to go away. She accepts anything in the form or shape of a check as payment, but if refused this tender she threatens a writ of

circ timent.

A very remarkable mania is that possessing a lady of middle age of this city, who is evidently one of culture and in good circumstances. She is a very handsome blonde. She first developed this mania in 1878, shortly after the publication of the cipher dispatches in The Tribusche. She appeared one day in this office and stated that she had an important communication to make, but would do so only on the promise that if it were used she should first correct and approve the report. She then stated that she had instituted three important suits, each for a million of dollars, one port. She then stated that she had instituted three important suits, each for a million of dollars, one against President Grant, another against the Police Commissioners, and the third against the Western Union Telegraph Company. This startling statement naturally aroused attention, and when she added that the suits involved and exposed the sending of the Republican cibbers during the campaign of 1875, she was argen to tell the story in the fullest detail. She then told who she was, where she lived, her connections, and her wrongs. Just before the election in 1876, while she was a been in the country, the Police Commissioners, under orders from President Grant, had sent officers to her house, taken possession of it, and protected the agents and operators of the Western I nion Telegraph Company while they were putting a The agents and operators of the western thron Telegraph Company while they were putting a large number of telegraph wires into the walls and ceilings of the house. These were so carefully concealed that when the mistress of the house returned she did not for a long time discover them. She did so then only because of the effect on her health. When asked how it affected her she stated that who recovered the only electrical value is the context of the con

Democracy.

In all these instances the victim was absolutely harmless, and generally patient and sad of manner. Each would have made an interesting study, and possibly these mere outlines of their peculiarities may prove of general interest.

grayish and brownish black color, and when pul-verized forms a black powder. It ignites with diffi-sulty and at a high temperature, but when ignited

The business done in stocks to-day (282,072 shares) shows a material decline from the amounts of transactions of preceding days of the week. Prices also were more or less unsettled and the health. When asked how it affected her she stated that she possessed the only electrical voice in the country, which for the purpose of sending their cipner dispatches without fear of exposure, the Republicans used, as they would use an electric battery! Of course this wild story revealed the mania which possessed her, but nothing else in manner or language indicated it. Informed that it would be impossible to use the information, she retired in a quiet and ladylike manner to give this explanation of the disappearance of the Republican cipher dispatches to the enemy for the gratification of the Democracy.

In all these instances the victim was absenting the proposed the only all these instances the victim was absenting their country. In all these instances the victim was absenting to the proposed only be natural after so long a progress in one dispersion as ten days, even if the progress made to ward higher figures was only one-half the advance which has been established since the Ohio and Inguitable for the disappearance of the Republican cipher dispatches to the enemy for the gratification of the Democracy. dealings exhibited no little feverishness. This would Alton and Terre Haute stocks were unusually active and strong, the common rising from 24 to

278, 22612, and the preferred from 85 to 882. Ohio

Central stock also made a movement toward following the recent large advance in the price of
the company's bonds, and rose from 28 to 2827.

Reading was another stock that was higher, despite
a weak line in the other coal stocks, and
its price advanced to 41. Of the general

market it only remains to say that the principal dealings were in St. Paul, Detaware, Lackawanna and Western. Lake Shore, New-Jersey Central, Erie, Wabash common and preferred stocks, and Pacific Mail, and that generally the early prices were the best of the day, and the last figures at or near to the lowest of the day. The market closed

dull and unsettled. Government bonds were dull, with transactions at the Boards that amounted only to \$33,000, and prices were a shade easier. The final bids show declines of 18 per cent for all the issues excepting for the 4s, which are unchanged. Annexed are the closing quotations:

The dealings in State bonds embraced only Alabamas, class A, at 6912, and Quebec 5s at 104. Louisiana consols are quoted at 49 @50, North Caro lina consolidated 4s 79@80, Tennessee 6s, old, 37 @39, and new 3214@33, and new series 3214@3278. Of city bank stocks the only sale was twenty-six shares of Phenix at 102.

Railroad bonds were irregular, but generally firm if not higher. Erie second consols were steady at between 94 and 94%, closing at 94%. We note a sale of funded interest of consolidated firsts at 11912. Missouri, Kansas and Texas first cousols were unchanged at 110, but the seconds advanced 11s per cent to 69 and closed at 6814. Rome, Watertown and Ogdensburg first consols rose from 72 to 7314 C., C. and L. C. first assented were steady at 95, the incomes rising 1 per cent to 46. Ohio Central firsts advanced to 98, and the incomes rose from 4714 to 4812@4814. Canada Southern firsts also were in demand, and the price advanced from 97 to 98. Peoria, Decatur and Evansville incomes rose 1 per cent to 7312. Chicago, St. Paul, Minneapolis and Omaha consols 78 per cent to 10112, and Wabash new 7s 34 per cen to 1014. Denver and Rio Grande issues were strong at about previous quotations, Kansas Pacific consols up 12 at 985 a 9812, and Texas and Pacific firsts, Rio Grande Division, advanced from 85 to 8714 @87, and the incomes rose 134 per cent to 7334.

The bank statement shows changes that were expected. A further expansion of \$1,231.400 brings the amount of loans up to \$317,043,300, while a loss of \$1,626,100 in specie and legal-tenders, and a reduction of \$1,735,900 in deposits shows that the drain of money to the interior was greater than was supposed. The surplus reserve is decreased \$1,192,125. The following are the totals

The Sub-Treasury to-day lost \$208,010 on balance, made up by a coin loss of \$343.554, less a currency gain of \$45,544. Money on call was a shade rency gain of \$45,544. Money on tan was a shade more active, the principal business being done at \$3\gamma\_24\$ per cent, but as usual the closing rate was \$2\gamma\_2\$ per cent. The domestic exchanges on New-York are weaker at the West and East—St. Louis declining to \$1.25. Chicago to \$1 and Boston to 10 cents discount. The customs receipts at Washington today amounted to \$506.301, and the internal revenue receipts to \$501.768. The Irsauer received enue receipts to \$501,768. The I reasurer received \$131,000 in National bank notes for redemption; the totals of such receipts for the week, compared with the same week of 1879, being as follows:

| New York | 1879, 1880, | 1879, 1880, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, | 1870, The Treasury now holds \$359,472,950 in United States bonds to secure bank circulation. United States bonds deposited for circulation for the week, \$1,550,000; United States bonds held for circula-tion withirawo for the week, \$2,012,500. National tion withdrawn for the week, \$2,012,500. National bank circulation outstanding: Currency notes, \$332,034,033; gold notes, \$1,322,385. The Clearing House statement to-day is as follows: For the day-Exchanges, \$135,226,332; balances, \$5,188,590; for the week-exchanges, \$5,188,590; for the week-exchanges, \$872,895,696; balances, \$32,910,082. The transactions at the Sub-Treasuri covered: Receipts, \$1,409,068; payments, \$1,707,078; currency balance, \$4,895,224; com balance, \$74,189,962.

As usua, on Saturdays, the foreign exchange markets are more than usually dull. Rates are steady on the basis of the following nominal quotations:

The London markets are reported dull and steady, but British consols rose is per cent to 993 a for both money and account. United States 4-bs are is higher at 113 s, and 4s is lower at 112 s. Erie stares rose to 45 bs and second consols to 97. Attantic and Great Western first trust receipts were is lower at 50, and seconds also is lower a 28 l. liknois Central declined from 118 to 117 s at 118. Reading was is higher at 20 s, and Central and Hudson was steady at 139. Bar sliver was weaker and declined to 52 pd. per cunce. In Paris, French 3 per cents rose to 85.90 france. Investors are reminded that at 2 o'clock p, m., Monday, October 25, the Controller of the orty will open proposals for \$2,800.000 consolidated 4 per cent stock of the city of New-York, payable in 1910, and exempt from taxation for city and county purand exempt from taxation for city and county pur

W. VAN NORDEN, Secretary.

A MIE CONSOLIDATED MINING CO.,

OF LEADVILLE, COLORADO

Organized under the laws of New-York. Capital stock, \$5,000,000; 500,000 shares; par value \$10 SHARES PULL PAID AND UNASSESSABLE. REGISTRAR of TRANSFERS, Union Trust Co., N. Y.

CHRYSOLITE SILVER MINING COMPANY

TO THE STOCKHOLDERS. In July last, by the resignation of a majority of the Board of Trustees and the election of new trustees to fill the suc of Trustees and the election of new trustees to fill the successive vacancies thus formed, the affairs of this Company came under the control of the policy now represented by the universymed as a practically new management.

The Company was heavily in debt and the mine was without definitely measureable reserves—the results of large expenditures and desperate straining after immediate product and excessive dividends.

The stool was rapidly decining under the effect of alarming reports circulated concerning it.

Since the first of August nearly four hundred thow and collars of debt has been careed and paid; the Company has a considerable cash surplus over all claims against it, and the explorations now in progress in the mine have already developed additional masses of ore. A more detailed account will be laid before the Stockholders at the approaching Annal Meetling.

Those Stockholders who wish the work thus begun to be

will be aid before the Stockholders as the approaching Annual Meeting.

Those Stockholders who wish the work thus begun to be continued, and the croperty of the Company to be administered with vacor and economy on business principles, without reference to the interest of speculators, without running indebt write paying dividuals, and without unisrepresentation of the Company's affairs either to encourage or discourage the borders of the undersigned.
